TTF Foundation technology on SGI 64-bit Processor

Lyon, France – May 17th, 2004 – TTF, a leading company in CAD data interoperability and multi-CAD DMU today announced the port of TTF Foundation CAD libraries technology on SGI 64-bit platform.

“The port of TTF Foundation technology on SGI 64-bit was successfully completed and we are extremely impressed by the excellent performances on such platform” said François Chrétien, President – Software Development of TTF “TTF foundation on 64 platforms will particularly benefit to our growing number of OEM partners”.

With this success and impressive performances, TTF is studying the possibility to port Project Reviewer™, its multiCAD DMU solution, which is a bestseller in major countries such as Germany, Italy and Japan. TTF is now in the process to evaluate the port of its technology on other 64-bit platforms such as SUN and HP.

About TTF

Located in Lyon-France, TTF develops, markets and supports best-in-class solutions for CAD data INTEROPERABILITY (TTF Foundation libraries), multi-CAD DIGITAL MOCK-UP and Collaborative Engineering solutions (Project Reviewer). Active in the automotive, aerospace, machinery and consumer products industries, TTF offers services including installation, maintenance, training, and other specialist developments worldwide.
