TTF announces new PR-Xpress for the Italian Market

Lyon, France / Bologna, Italy – March 3rd, 2006, TTF, a leading company in CAD Libraries (TTF Foundation) and multi-CAD Digital Mock up solutions (Project Reviewer), and Microsystem, the largest independent technology-provider to the Italian mechanical industry, announced today the availability of the new PR-Xpress module of Project Reviewer for Italian customers.

PR-Xpress, the new easy-to-use module of Project Reviewer, reads PRC (hyper compressed geometrical format for the major CAD files) as well as PRW files (Project Reviewer format) with viewing, dimensioning and sectioning capabilities.

With PRC Generator module, customers are able to create highly compressed and accurate PRC files databases from their CAD data and they can use PRC in the supply chain with PR-Xpress.

PR-Xpress now allows PRC to be widely used in the enterprise.

“Major companies in Italy have already adopted Project Reviewer in their processes, PR-Xpress ‘s introduction in our market is welcome. I see tremendous opportunities in Italy for PR-Xpress combined with the impressive PRC CAD data compression ” said Massimo Caccia , Sales Manager Director of Microsystem

“TTF always listens to its customers and provides the most innovative technology for collaboration in multi-CAD environment. As PRC has become a strategic format for large companies and as it is seen as the future standard format for collaboration, we introduced PR-Xpress to make PRC data easily accessible throughout the supply chain” said Khaled Moussa, President Business development of TTF, “ I am sure that PR-Xpress will strengthen Microsystem’s business in Italy”.

About TTF

Located in Lyon-France, TTF develops, markets and supports best-in-class solutions for CAD data INTEROPERABILITY (TTF Foundation libraries), native-to-native translators and multi-CAD DIGITAL MOCK-UP and Collaborative Engineering solutions (Project Reviewer). Present in the automotive, aerospace, machinery and consumer products industries, TTF offers services including installation, maintenance, training, and specific developments worldwide.
